

The Future of Wireless Infrastructure in the US

dc digitalcolony.com/press/future-wireless-infrastructure-us

Day One Opening Keynote by Marc Ganzi, CEO of Digital Bridge Holdings

September 9, 2015 - Tower & Small Cell Summit at CTIA Super Mobility - The Tower Industry continues to evolve in the US and Americas region as operators need more macro tower sites and in-building and outdoor small cells to fill coverage holes and add capacity in mobile networks. In this presentation, Marc Ganzi, CEO of Digital Bridge Holdings, outlines the state of wireless infrastructure, as well as offer options for carriers and infrastructure companies to keep up with mobile data traffic demand.
